Take Charge of Your Health
Cancer Prevention, Early Detection and Genetics

5:30–8:30 p.m. Thursday, Aug. 30, 2018
First National Bank Exhibition Hall at The Ranch
5280 Arena Circle
Loveland, CO 80538

Knowing your family history is the first step in prevention and early detection of certain types of cancers. Could you be a candidate for genetic testing? Come hear from an expert panel of medical providers to learn more about common types of cancers affecting women and steps you can take to reduce your risk.

Keynote:
Dr. Christine Cooper, stage IIIc ovarian cancer survivor, will speak on the importance of knowing family history and genetic testing.

Panelists:
Diana Medgyesy, MD, Oncologist, UCHealth Cancer Center
**Topic:** Cancer prevention—what you can do to decrease your risk
Angela King, MD, Women’s Clinic of Northern Colorado
**Topic:** HPV-associated cancers and the roles of vaccination and screening prevention
Rebecca Dunphy, MD, Centers for Gastroenterology
**Topic:** Lynch syndrome/colon cancer
Lynn West, MD, Dermatologist, Founder—Dermatology of Northern Colorado
**Topic:** Melanoma and other skin cancers
Amanda Lenderink-Carpenter, MD, Director of Diagnostic Radiology, UCHealth Breast Diagnostic Center
**Topic:** Types and regimens of breast cancer screening

Fee: $10 (before Aug. 1), $15 (Aug. 1–29), $20 at the door
